Art Unit: 1794

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 5, 2009 has been entered.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okawa (2002/0022062) for reasons of record.

Okawa discloses an extract of coffee beans used to prevent hypertension. The beans used for the extraction can be raw, decaffeinated or roasted and the remedy may be in the form of a powder, beverage, tablet or candy. In example 3, 3.6% coffee bean extract, which is from T. Hasegawa Co. is used with water, citric acid and vitamin C. In example 9 a medical vitamin drink is made containing the same coffee bean extract in

an amount of 350 mg in 50 ml water. The claims appear to differ from Okawa in the composition of the coffee bean extract. Applicant describes his coffee bean extract in example 20 as being from the same place as Okawa does (page 13, second to last line of specification) and refers to example 5 as a preferred embodiment. Further in the Specification at Table 1 the coffee bean extract is described as containing all of the components of the claims. It would have been obvious to one of ordinary skill in the art to expect the powdery food of Okawa to have the composition of the claims because it is made from the same ingredients. It is appreciated that the Brix content is not mentioned but coffee products are known in the art to be sweetened. No unobvious or unexpected result is seen from the specific Brix level that is used in the composition. To package a beverage would have been an obvious way to dispense the beverage. The chlorogenic acids of claims 13-25 and 31-34 are disclosed in Okawa in paragraph 0015.

Applicant argues and provides a declaration attesting to the fact that the ratio of hydroxycarboxylic acid to chlorogenic acid is 19.8 in example 9 of Okawa. Applicant urges unexpected improvement in taste when samples are prepared that maintains a specific ratio of hydroxycarboxylic

acid to chlorogenic acids. This has been considered but is not persuasive because there is no requirement in Okawa for high levels of vitamin C be included. Examples 3 and 5 would be expected to have substantially lower levels of hydroxycarboxylic acid.

The rejection of the claims over Suzuki has been withdrawn.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carolyn A Paden whose telephone number is (571) 272-1403. The examiner can normally be reached on Monday to Friday from 7 am to 3:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Keith Hendricks can be reached by dialing 571-272-1401. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
